

SuperOcean 58

SuperOcean

SuperOcean is a new brand

Created by two companies totalizing more than one hundred years of experience in the boating and yachting industry in Italy and France, the SuperOcean brand was initiated for a simple reason : the features of its yachts have no equivalent whatsoever in the market.

With a very specific DNA

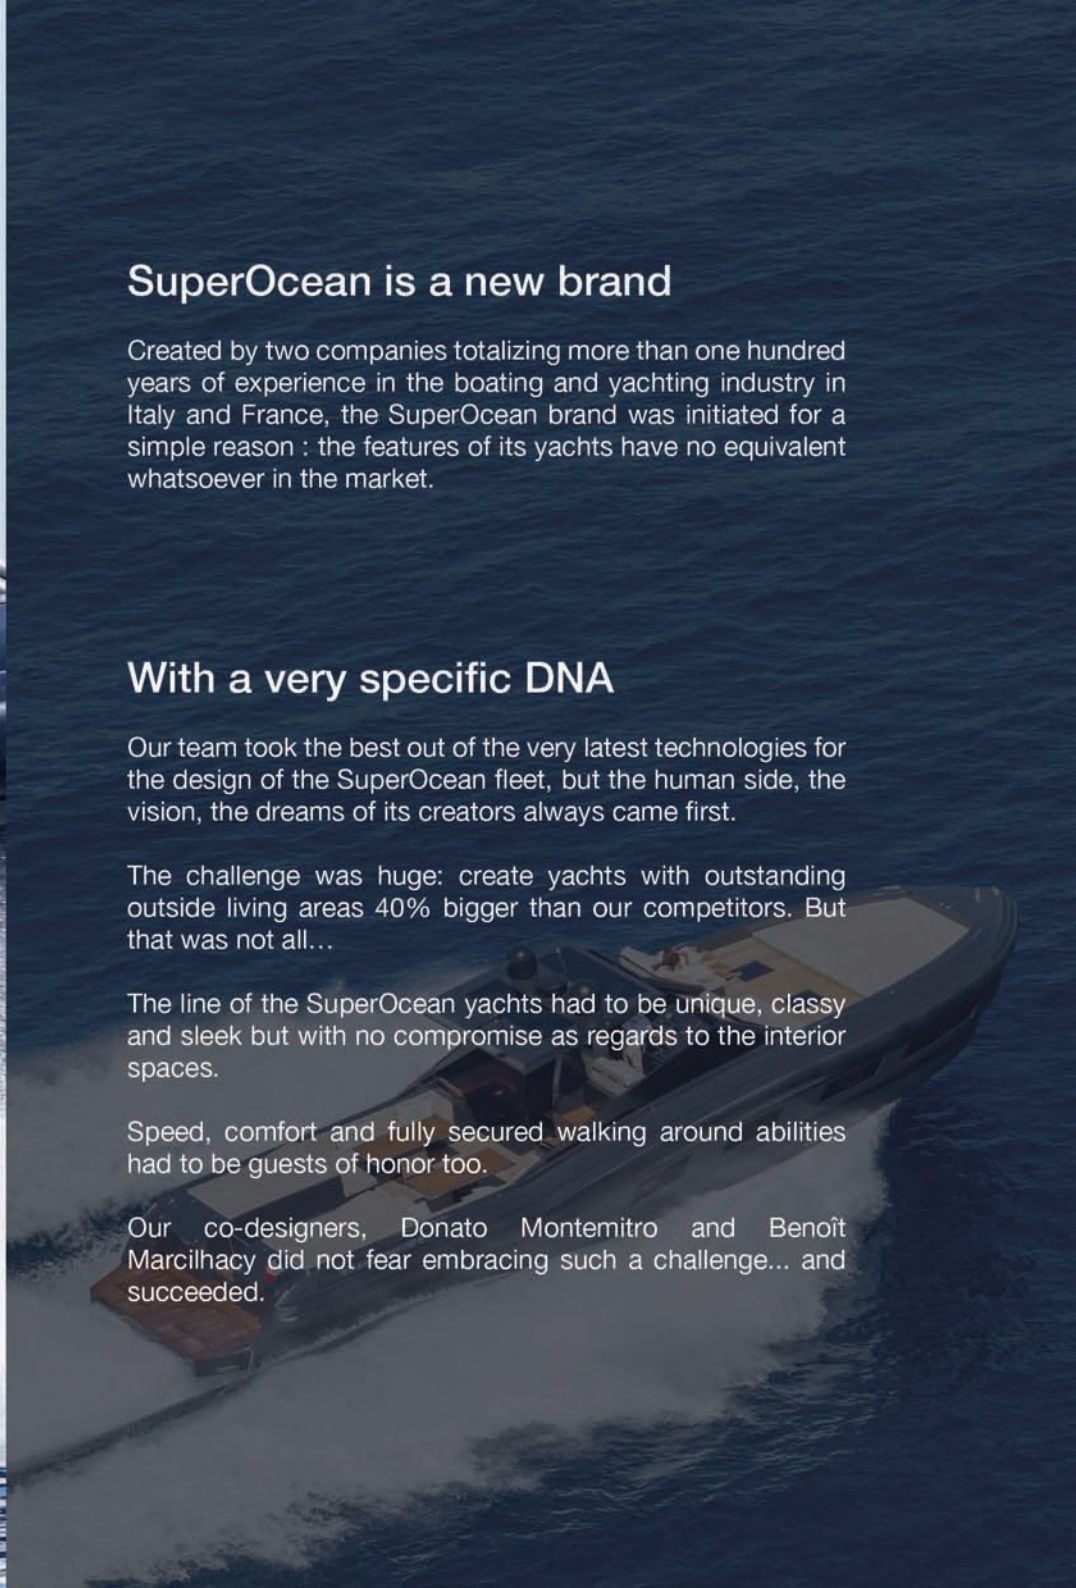

Our team took the best out of the very latest technologies for the design of the SuperOcean fleet, but the human side, the vision, the dreams of its creators always came first.

The challenge was huge: create yachts with outstanding outside living areas 40% bigger than our competitors. But that was not all...

The line of the SuperOcean yachts had to be unique, classy and sleek but with no compromise as regards to the interior spaces.

Speed, comfort and fully secured walking around abilities had to be guests of honor too.

Our co-designers, Donato Montemitro and Benoît Marcihacy did not fear embracing such a challenge... and succeeded.

 SuperOcean 58 

SuperOcean 58

The hull of the SuperOcean 58 has been carefully handcrafted with the help of the latest laser shape cutting technologies.

As a result, human psychology and imagination knew no limits while technology ensured perfection of performance.

The hull of the SuperOcean 58 beneficiaries from decades of hull shaping experience thanks to its Italian and French co-founders. Many innovations have been implemented for a result beyond expectations. For example, 100% of water projections are deflected thanks to world premier innovations applied to the flanks shapes.

High density painting is systematically applied on SuperOcean yachts, ensuring longevity and total freedom as to the choice of colors.

Comfort, lightness and speed are the main qualities of the outstanding hull of the SuperOcean 58.

SuperOcean 58

The outside living areas

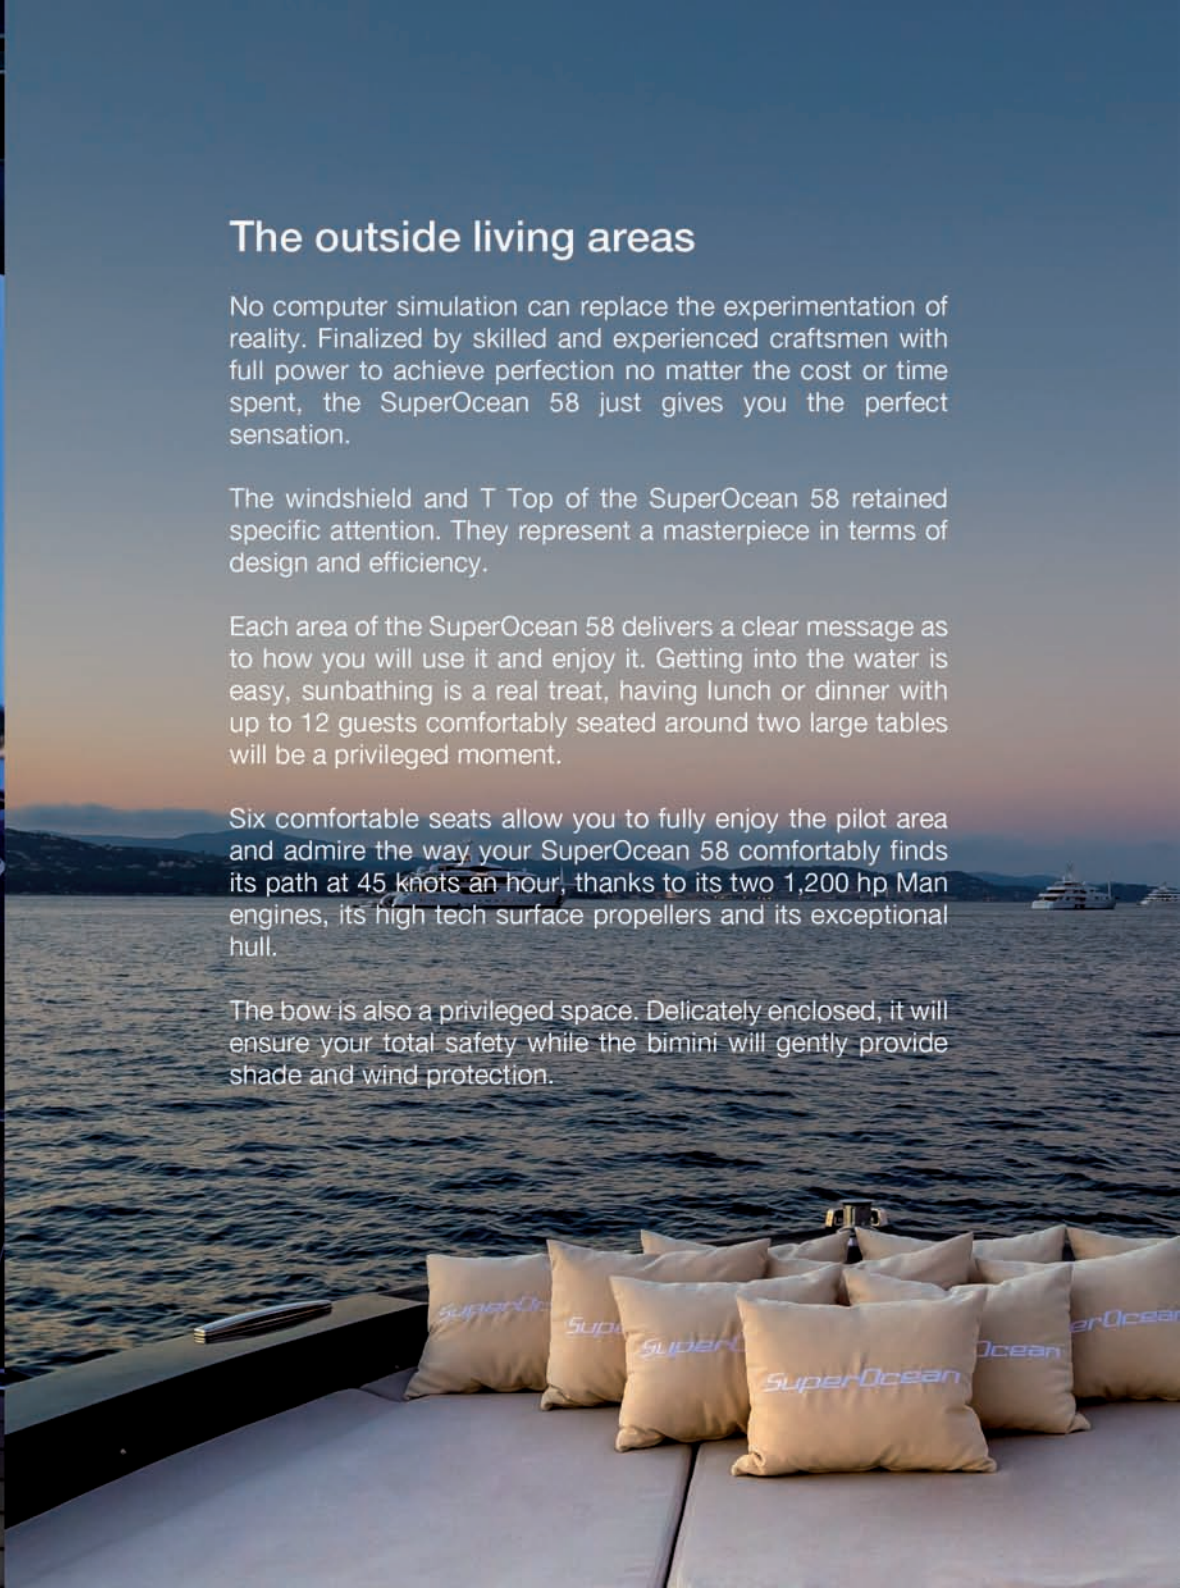

No computer simulation can replace the experimentation of reality. Finalized by skilled and experienced craftsmen with full power to achieve perfection no matter the cost or time spent, the SuperOcean 58 just gives you the perfect sensation.

The windshield and T Top of the SuperOcean 58 retained specific attention. They represent a masterpiece in terms of design and efficiency.

Each area of the SuperOcean 58 delivers a clear message as to how you will use it and enjoy it. Getting into the water is easy, sunbathing is a real treat, having lunch or dinner with up to 12 guests comfortably seated around two large tables will be a privileged moment.

Six comfortable seats allow you to fully enjoy the pilot area and admire the way your SuperOcean 58 comfortably finds its path at 45 knots an hour, thanks to its two 1,200 hp Man engines, its high tech surface propellers and its exceptional hull.

The bow is also a privileged space. Delicately enclosed, it will ensure your total safety while the bimini will gently provide shade and wind protection.

The inside living areas

The aim was simple whilst almost unachievable for a yacht of this size and sleek shape :

- 3 double cabins, 3 bathrooms, one living room, one galley and one crew cabin
- High ceilings and space feeling everywhere

Thanks to the "S" shape design and to many hours of hard work : mission accomplished. With huge portholes on both sides and on the ceilings, light is flowing in. The SuperOcean 58 is also available in one or two master cabins configurations.

Simple lines and materials of high quality have been the permanent leitmotivs of the interior designers, the famous Alford and Weiss Studio, masters of the French touch and "bon goût".

The interior of the SuperOcean 58 is entirely customizable allowing owners to feel perfectly at home when cruising aboard their unique yacht.

Technical specifications

- Length overall: 58 feet (17,60 mt)
- Beam max: 5.20 mt
- Draft at propeller: 1.1 mt
- Fuel tank capacity: 2 x 1,200 lt
- Fresh-water capacity: 500 lt
- Black water capacity: 80 lt
- Grey water capacity: 120 lt
